

TEMPORARY EXTERIOR CONTAINMENT SYSTEM **EXTREME®** **WEATHER BARRIER**

WEATHER OUT. WORK ON.

EXTreme® Weather Barrier creates temporary exterior protection around active construction areas, protecting work from wind, rain, debris, and changing site conditions. Unlike traditional shrink wrap systems, EXTreme® requires no hot work permit, resulting in safer and streamlined installations.

IDEAL FOR:

Exterior Construction, Building
Envelope, Facade Work, Renovation,
Temporary Enclosures

PROPERTIES

SPECIFICATIONS

Material Construction

7-ply scrim-reinforced film with
flame-retardant additives

Nominal Thickness

10 mil

Ply Count

7-Ply

Floor Connection

Steel, Concrete, etc.,
using proprietary hardware

Maximum Use Temperature

150°F

Minimum Use Temperature

-70°F

Interior or Exterior Use

Exterior

UV Resistant

Yes

Attachment Points

Beam, Concrete, Bar Joists
using proprietary hardware

Construction Doors

Yes

FEATURES

CONTROLS FLAME SPREAD

Fire-retardant additives support
safer temporary containment.

WEATHER RESISTANT

Isolates protected spaces from
wind, rain, and external elements
during construction.

INNOVATIVE SCRIM DESIGN

Diagonal & in-line scrim layers
maximize strength, tear resistance,
& durability.

CUSTOM-FIT DESIGN

Adapts around equipment, columns,
access points, and complex layouts

TEAR/RIP RESISTANT

Perfect for EXTreme® conditions
when standard barriers fail
