

TEMPORARY CONTAINMENT HYBRID WALLS™

EXTRA PROTECTION WHERE IT MATTERS MOST.

Hybrid Walls™ are reinforced temporary containment walls designed for active environments where standard temporary separation may need added protection. TuffPanel® combined with any of our wall systems will create a more durable lower wall configuration for areas exposed to regular pedestrian, cart, or operational traffic.

IDEAL FOR:

Manufacturing, Warehousing,
High-Traffic Areas, Renovation, Active
Commercial & Industrial Facilities

PROPERTIES	SPECIFICATIONS
Material Construction	10 mm extruded, corrugated polypropylene with FR additive
Floor Connect	TuffBracket
UV Resistant	No
Weather Resistant	No
Maximum Use Temperature	180°F
Minimum Use Temperature	-70°F
Construction Doors	Yes

FEATURES

CONTROLS FLAME SPREAD

Fire-retardant additives support safer temporary containment.

NO STRUCTURAL SUPPORT REQUIRED

Faster installation with less impact on the facility.

INNOVATIVE SCRIM DESIGN

Diagonal & in-line scrim layers maximize strength, tear resistance, & high-pressure durability.

CUSTOM-FIT DESIGN

Adapts around equipment, columns, access points, and complex layouts
