

HEAVY-DUTY TEMPORARY WALLS

INDUSTRIAL

HYBRID WALLS™

HEAVY-DUTY WALLS BUILT FOR FORKLIFT AND EQUIPMENT TRAFFIC

Industrial Hybrid Walls™ are heavy-duty temporary containment walls designed for active industrial environments where forklifts, carts, equipment, and material movement create added demands on the containment boundary. This addition is available across any TuffWrap® wall system.

IDEAL FOR:

Manufacturing, Warehousing, Forklift Areas, Distribution, Material Handling, Active Industrial Facilities, Privacy in Sensitive Work Environments

PROPERTIES	SPECIFICATIONS
Material Construction	1/2 inch plywood with FR additives, reinforced edges, 4x8 panels
Nominal Thickness	15/32 inch
Weather Resistant	Yes
Floor Connection	TuffBracket
Maximum Use Temperature	180°F
Minimum Use Temperature	-70°F
Construction Doors	Yes

FEATURES

CONTROLS FLAME SPREAD

Fire-retardant additives support safer temporary containment.

HEAVY-DUTY PLYWOOD BASE

Exceptional durability & protects against incidental damage & abrasions.

REINFORCED FRAMELESS UPPER WALL

Upper containment system that extends wall height and adapts to changing project needs without sacrificing dust containment.

ADAPTABLE & DURABLE

Adds impact protection & structural strength via a proprietary support system; compatible with any TuffWrap Frameless Wall® system.
