INTERIOR/EXTERIOR WALLS & DOORS

- ✓ Avoids costly production shutdowns
- ✓ Protects employees and customers
- ✓ Averts product recalls
- ✓ Prevents equipment and inventory damage

INTERIOR WALLS. TuffWrap Interior Walls and Doors ensure the workspace is fully functional during construction by temporarily separating the work environment from the construction zone. TuffWrap C.O.R.E. Frameless Walls®, Hybrid Walls, Total Enclosures, and Construction Doors maintain a professional appearance while being an effective barrier against the migration of dust and debris during renovation, retrofits, or other interior construction projects. Our temporary interior walls can be custom fit to any application and include door options that enable personnel and equipment access and egress.

EXTERIOR WALLS. TuffWrap Exterior Walls and Doors' resilient design and installation process extends the construction season and reduces downtime, keeping the project on schedule and protected from the weather. TuffWrap® EXT temporary exterior walls and doors ensure strongholds during unexpected conditions – without scaffolding. It provides the highest puncture resistance and tear strength for an exterior wall. TuffWrap® EXT is custom engineered to fit the project requirements, covering large openings and spans, exterior walls can install almost anywhere.

TuffWrap® Temporary Barrier Solutions Safeguard and Keep Facilities Operational During Construction

TuffWrap® Installations is the North American leader in innovative temporary dust, debris, and construction containment solutions, keeping facilities operational, providing protection, and helping mitigate your exposure to liability.

The TuffWrap Difference

- **Communication** – We will give you a budget, if it makes sense, we schedule an onsite estimate.
- **Flexible Scheduling** – We work the hours that are best for your company, evenings and weekends are no extra charge.
- **Safety is a Top Priority** – Our Safety Program meets or exceeds industry qualifications.
- **No Subcontractors** – Our crew members are all full-time employees and OSHA 30 trained.
- **Customized Approach** – Our Project Management Team is committed to client relationships and meeting the specific project requirements.
