

C.O.R.E. Frameless Walls®

TEMPORARY INTERIOR WALLS

FLAME RESISTANT

Innovative composition designed to **reduce flame and smoke spread** for temporary interior walls.

ANTIMICROBIAL

Protects against mold, mildew, and bacterial growth.

INNOVATIVE SCRIM DESIGN

Diagonal and perpendicular scrim orientation **resists tearing**.

FRAMELESS WALLS

No structural support needed to fully seal temporary walls from the roof deck to the floor.

REINFORCED HYBRID WALLS

C.O.R.E. Frameless Walls® combined with food-grade safe **TuffPanel®** or **flame-retardant plywood** offers the structural rigidity of framed walls.

ANTISTATIC

Mitigates electrostatic discharges (ESD) to **protect against combustible dust**.

STRONG 4-PLY MATERIAL

Six mil thick, four-layer polyethylene material provides **highest puncture resistance and tear strength**.

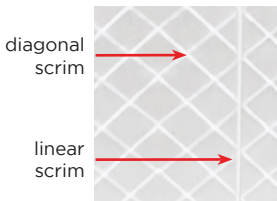

CUSTOM FIT

Tailor an enclosure to your requirements for an engineered protection solution.

CONSTRUCTION DOORS

Functional Pocket and Zipper Doors customized access for temporary interior walls.

The diagonal scrim is like a ripstop, evenly distributing point loads across the material.

The linear scrim holds installation tension by transferring the load to anchor points on the building.

TEMPORARY WALLS – ANY PROJECT. ANY SIZE.
